

ENVIRONMENTAL POLICY

E-NAV Offshore Operaciones México is a leading Offshore Supply Company that is dedicated to chartering services and operation of offshore supply vessels. We recognize the importance of maintaining safety for the prevention of accidents, as well as the care and preservation of the environments that we operate in. That is why ENAV is dedicated to the control of all the necessary factors and aspects, adopting the following commitments:

1. Identify environmental aspects, to establish controls that minimize environmental risk and impact
2. Prevent contamination by identifying best practices and international standards
3. Comply with the Legal requirements and other requirements applicable to the Organization
4. Train staff to ensure that they have knowledge of environmental care and protection
5. Prevent excessive emissions generated by the activities of our vessels
6. Continuously improve the management system to achieve improvements in overall environmental performance

Sincerely,

Management Committee Member
D.M. Wallace
